Dr. Phoebe Huang
Director, Scientific Data Services

Dear Dr. Lederberg:

Since you've been involved (at times involuntarily) with Scientific DataLink (SDL), I wanted you to know that I will be leaving SDL at the end of April, 1986. With the help and support of a group from the Information Industry, I am creating an AI information company - **Aitek.**

On behalf of all of the SDL staff, I want to thank you for any help you've given us.

The AI collections we've already published do, I believe, make a contribution to the growth of AI as an academic discipline as well as the growth of AI as a set of commercial technologies. These collections include the AI technical reports from:

> MIT (both the pre-1979 and post 1979-83 papers)
> Stanford University
>   (the SAIL papers and the Knowledge Systems Laboratory
>   collection)
> Carnegie-Mellon University
> SRI International
> Bolt Beranek & Newman
> Rutgers University
> Yale University

We have also brought out the Pattern Recognition/Image Processing collection from Purdue University, the work of the late K.S. Fu, and a Computer Vision collection from the University of Maryland.

The groundwork is being done to ensure that these remaining AI collections are published this year:

> University of Edinburgh
> University of Texas, Austin
> University of Massachusetts
> University of Pennsylvania

It has been our privilege to have been associated with you, even peripherally, and I personally hope to have the opportunity to meet with you again at some point.

Yours sincerely,

Phoebe Huang
